School of Computing and Data Science

This document provides the necessary guidelines for the presentation and submission of your Final Year Project (FYP) report. Kindly read the following guidelines carefully to ensure that you complete all requirements for your FYP submission for the **2026/09** semester.

1. PREPARE THE REQUIRED DOCUMENTS FOR SUBMISSION

- Submit your Final Year Project (FYP) report in two files formats: Microsoft Word (.docx) and PDF (.pdf).
- The report should follow the "Guidelines for Final Year Project Report Writing", distributed early this semester on the Moodle course webpage, together with the other required documents.
- The minimum word count for the Project Report/Thesis is **10,000 words** and **must not exceed 30,000** words, excluding tables, figures, and references. Rename the FYP report file using the following format:
  - **StudentID_Full Name_Thesis**
- Submit the final Turnitin Similarity report with a similarity percentage of **not more than 20%**. Rename the Turnitin Similarity Report file using the following format:
  - **StudentID_Similarity_Report**
- Submit the Academic Project Logbook in PDF format (Supervisor's signature is required). The logbook template was made available earlier this semester on the Moodle course webpage. Rename the logbook file using the following format:
  - **StudentID_Name_Logbook**
- Overall, students are required to submit all the documents listed below before the presentation.
  - Copy of the FYP report (PDF version)
  - Copy of the FYP report (Word version)
  - Turnitin Similarity Report
  - Signed Academic Project Logbook
  - Working Prototype / Demo Video / Experimental Process
  - AI Usage & Similarity Agreement Form
- Compress all the above documents into one **ZIP or RAR** file. Rename the compressed file using the following format:
  - **StudentID_Fullname**

2. SUBMISSION OF DOCUMENTS

- Submit the compressed file (prepared in Step 1) to the Moodle course webpage via the "FYP Student_Submission Link_Before presentation". If the compressed file exceeds 20 MB, follow the procedure below:
    - upload the required six documents (from Step 1) to OneDrive (Do not compress/zip the documents, except for the Working Prototype file),
    - copy the OneDrive sharing link into a text file (.txt). Rename the text file as: **StudentID_Name_OneDrive**, and then upload the text file to the Moodle.
- Students are also required to email an electronic copy of their FYP reports in both Word and PDF versions, Working Prototype / Demo Video / Experimental Process, and Turnitin Similarity Report to their supervisor and moderator.
    - The submission deadline is **2.00 p.m., 30 December 2026 (Week 14)**.
- A penalty of 5% will be applied upon the expiry of the deadline. A further 5% penalty per day (24 hours) will be applied for each subsequent day after the due date.
- A penalty of 2% will be applied for incomplete submissions. This includes missing required submission documents and/or missing signatures in the logbook. If the submission does not include the FYP report, it will be considered a late submission and will be subject to the applicable late-submission penalty stated above.
- A penalty of mark deduction will be applied to **Deferred Cases** of the semester. This could probably **downgrade** your overall marks from the actual grade marks.

3. CONDUCT THE PRESENTATION SESSION AS SCHEDULED

- The **FYP presentation** will be conducted on **4 and 5 January 2027 (Week 15)**. The detailed presentation schedule will be uploaded to the Moodle course webpage before the end of Week 12.
- Mode of FYP presentation: **Physical Presentation**. The presentation sessions will be recorded using MS Teams. Students should follow their supervisor's instructions regarding the recording process.
- Each student will be allocated a fixed time slot of **40 minutes**:
    - 25 minutes - presentation and demonstration
    - 15 minutes - Q&A session.

- After the presentation, students are **required to complete the necessary corrections**, as specified by the supervisor and/or moderator (major corrections, minor corrections, or no corrections).
