School of Computing and Data Science

This guideline is prepared by the School of Computing and Data Science (SCDS), Xiamen University Malaysia. It lists some reference points to note for preparing the SCDS final year project report and presentation. This guideline applies to students enrolled in **CST404/DMT402/SWE407/CYS401/ DSC401**.

1. Week 1 – Week 14

- The student shall meet their supervisors every week (physical or online meetings).
- Student shall use the logbook to write all related activities and findings throughout the duration of the project.
- Students who fail to meet with their supervisors for two consecutive meetings will be reported to the Office of Academic Affairs (OAA) for further action.
- Students are strongly advised to check their final year project report (by week 14) with their supervisors before submitting it for evaluation.
- The deadline for the final year project (FYP) report submission is expected to be on the Wednesday of week 14.
- An examination panel will be formed to evaluate the report and presentation. Student shall present their project as scheduled by SCDS. The presentation is compulsory to pass this course. Students are not allowed to reschedule the presentation without a valid reason.
- The examination panel will mark the FYP from multiple perspectives: novelty, complexity, usability, etc. Grading of the FYP will be based on standard marking rubrics.
- Student shall submit the following documents before the presentation.
    - A copy of the FYP report (PDF and Word Version)
    - Signed Logbook
    - Turnitin similarity report
    - AI similarity and agreement form
    - Working Prototype/ Demo Video/ Experimental Process
- Failure to submit these documents on time without any valid reason may result in a penalty.
- A penalty of 5% will be applied upon the expiry of the deadline. A subsequent penalty of 5% per day will be applied for each day (24 hours) after the due date.
- A penalty of 2% will be applied for incomplete submissions. This includes missing some of the submission documents and missing signatures in the logbook. If the submission

documents do not include the project report, then it will be considered a late submission and will be penalized according to the above clause.

- Plagiarism shall be definitively forbidden. The cut-off for the similarity index is below 20%. The student who committed plagiarism shall be penalized according to the university guidelines for academic misconduct.
- Irrespective of the similarity index, it is still considered plagiarism if a student has copied an entire sentence, a paragraph, or a significant portion of the sentence without appropriate citation and quotation marks around the corresponding text. In such cases, the examiners will impose a penalty in the corresponding segment(s) of the marking rubric.

2. Guideline for Presentation

- Generally, the content of the presentation shall include:
  - Outline of the presentation
  - Background information
  - Literature review
  - Problem statement, aim, and objectives
  - Design, implementation, and findings from the project
  - Conclusion and future works
  - A demonstration of the implementation/process of the experiments/prototype
- For further details, students can discuss with their supervisors to plan and prepare for the presentation. Students are also advised to check the marking rubric to ensure that all the presentation criteria are fulfilled.
- A fixed time slot (40 minutes) will be given for each student to present (25 minutes for presentation and demonstration + 15 minutes Q & A). It is advised to spend about 15 minutes delivering the contents of the presentation and 10 minutes on the demonstration.
- The presentation sessions will be recorded.
