SECTION A : REPORT

1. ABSTRACT

Score and Descriptors

Excellent (5)	Good (4)	Average (3)	Need Improvement (2)	Poor (0 - 1)	Select Score
Comprehensive summary which indicates a clear and concise description of all of the followings in a coherent manner: □ problem statement, □ the significance, □ methodology, □ findings and conclusion of the project.	Good summary which indicates a concise description of all of the followings in a generally coherent manner: □ problem statement, □ the significance, □ methodology, □ findings and conclusion of the project.	Satisfactory/ adequate summary which indicates some description of the followings, but in an incoherent manner: □ problem statement, □ the significance, □ methodology, □ findings and conclusion of the project.	A summary is provided, but missing many details of the following: □ problem statement, □ significance, □ research methodology, □ findings and conclusion of the project.	□ Does not include an abstract, or □ Fails to achieve a minimum standard outlined in the descriptors.	

2. INTRODUCTION

Score and Descriptors

Excellent (5)	Good (4)	Average (3)	Need Improvement (2)	Poor (0 - 1)	Select Score
The topic is introduced accurately with well-structured and clear specifications of the project that cover all of the followings with supporting details: □ clearly introduces the context □ clearly identifies the problem statement and justification □ clearly identifies the aims and objectives □ clearly identifies the scopes □ clearly indicate the contributions and the structure of the report	The topic is introduced with well-structured specifications of the underlying project that cover most of the followings with supporting details: □ introduces the context □ identifies the problem statement and justification □ identifies the aims and objectives □ identifies the scopes □ indicate the contributions and the structure of the report	The topic is introduced vaguely with an adequate statement of context supporting rationale for the underlying project. Some supporting details of the following are missing/ambiguous: □ attempts to introduce the context □ indicates the problem statement and justification, but lacks supporting details □ identifies the aims and objectives □ attempts to identify the scopes □ indicate the contributions and the structure of the report	The topic is introduced incoherently. Many supporting details of the following are missing/ ambiguous: □ no context included/ context not appropriate □ problem statement and justification of the study are barely mentioned □ the aims and objectives are not clear/ not feasible □ scope is not identified/ too broad □ Structure of the report is included	□ Fails to achieve a minimum standard outlined in the descriptors.	

3. LITERATURE REVIEW

Score and Descriptors					
Excellent (9 - 10)	**Good (7 - 8)**	**Average (5 - 6)**	**Need Improvement (3 - 4)**	**Poor (0 -2)**	**Select Score**
□ Provides a comprehensive description of the literature relevant to a particular field or topic of study. □ Critically written and comprehensive account of the existing works on the topic. □ Put ideas, information, data and arguments together in a well-integrated and coherent manner. □ Identifies the gap to indicate how and where the project fits in.	□ Provides a good description of the literature relevant to a particular field or topic of study. □ Some level of criticality in the writing and most of the existing works on the topic is included. □ Put ideas, information, data and arguments together in a generally well-integrated and coherent manner. □ Identifies the gap to indicate how and where the project fits in.	□ Provides a basic description of the literature relevant to a particular field or topic of study. □ Descriptive writing and some of the existing works on the topic is included. □ Some ideas, information, data and arguments are included in an adequately well- integrated and coherent manner. □ Attempts to identify the gap, but is not clear.	□ Provides a limited description of the literature relevant to a particular field or topic of study. □ Little analysis of existing work is included. □ Some ideas, information, data and arguments are included, but these are presented in an unclear and incoherent manner. □ Inclusion of irrelevant work detracts from the quality of the argument. □ No attempts made to identify gap.	□ Fails to achieve a minimum standard outlined in the descriptors.	

4. DESIGN OF APPROACH

Score and Descriptors					
Excellent (12 - 15)	**Good (10 - 11)**	**Average (8 - 9)**	**Need Improvement (6 - 7)**	**Poor (0 - 5)**	**Select Score**
□ Methodologies/ techniques/ system development model used in relation to the topic is relevant and appropriate □ Methodologies/ techniques/ system development model and design process is clearly described. □ Selection of methods/ system development model and design choices is justified.	□ Methodologies/ techniques/ system development model used in relation to the topic is generally relevant and appropriate. □ Methodologies/ techniques/ system development model and design process is described fairly well. □ Selection of methods/ system development model and design choices is stated and mostly justified, but could be improved further.	□ Methodologies/ techniques/ system development model used in relation to the topic is somewhat adequate. □ Attempts to describe the methodologies/ techniques/ system development model and design process, but the description is unclear. □ Attempts to justify the selection of methods/ system development model and design choices.	□ Methodologies/ techniques/ system development model used in relation to the topic is trivial and not appropriate/ questionable. □ Description of methodologies/ techniques/ system development model and design process is not clear. □ Selection of methods/ system development model is not justified/ not appropriate.	□ Fails to achieve a minimum standard outlined in the descriptors.	

5. EXPERIMENT / IMPLEMENTATION AND TESTING

Score and Descriptors

Excellent (20 - 25)	Good (16 - 19)	Average (13 - 15)	Need Improvement (11 - 12)	Poor (0 - 10)	Select Score
□ Experiment/ implementation and testing detail are clearly described. □ Fully completed as per the objectives of the project. □ Project idea is complex as per Bachelor degree expectation. □ For development project: unique and/or creative/ innovative and functions well without any errors/ issues. □ For research project: extended existing research with insightful outcomes.	□ Experiment/ implementation and testing details are described. □ Mostly completed as per the objectives of the project. □ Project idea is fairly complex as per Bachelor degree expectation. □ For development project: unique and/or creative and generally functions well. □ For research project: extended existing research with new outcomes.	□ Experiment/ implementation and testing details are partially described. □ Limited implementation of initial specification (fulfills part of the project objectives). □ Project idea is inadequate/ trivial. □ For development project: not unique, but modified and improved from the existing source and generally functions well. □ For research project: replication of existing research with the same outcomes as existing research.	□ Experiment/ implementation and testing details are partially described. □ Does not fulfills the objectives. □ Unable to complete the trivial experiment/ implementation. □ For development project: not unique, modified from the existing source with minimum changes and does not function well. □ For research project: replication of existing research but outcomes are not clear.	□ Fails to achieve a minimum standard outlined in the descriptors, and/ or □ Project is plagiarized.	

6. RESULTS AND DISCUSSION

Score and Descriptors

Excellent (12 - 15)	Good (10 - 11)	Average (8 - 9)	Need Improvement (6 - 7)	Poor (0 - 5)	Select Score
□ Obtained new results. □ Results are clearly presented and described with respect to the problem statement in the form of text, figures, tables, and/ or screenshots of functional software prototype and other appropriate forms. □ Project's finding's is thoroughly compared and contrasted with existing works.	□ Obtained new results □ Results are presented and described in the form of text, figures, tables, and/ or screenshots of functional software prototype and other appropriate forms, but there is room for improvement in the interpretation of the results. □ Project's finding's is compared and contrasted with existing works.	□ Obtained trivial results. □ Results are presented and described, but it is hard to interpret the outcome. □ Some comparison is provided to analyze the results.	□ Little/ no results are obtained. □ Attempts to present the results, but it is hard to interpret the outcome. □ No analysis is provided.	□ Fails to achieve a minimum standard outlined in the descriptors.	

7. CONCLUSIONS AND RECOMMENDATIONS

Score and Descriptors

Excellent (5)	Good (4)	Average (3)	Need Improvement (2)	Poor (0 - 1)	Select Score
□ Comprehensive summary of the findings/ contributions and their implications is provided. □ Limitations of the study are well addressed. □ Future work included.	□ Good summary of the findings/ contributions and their implications is provided. □ Limitations of the study are addressed. □ Future work included.	□ A basic summary of the findings/ contributions is provided. □ Limitations of the study are somewhat addressed, □ Future work included, but may be inappropriate.	□ A very limited Summary of the findings/ contributions is included. □ Limitations of the study are not included/ specified but not correctly identified. □ Future work is not included.	□ Fails to achieve a minimum standard outlined in the descriptors.	

8. REFERENCES

Score and Descriptors

Excellent (5)	Good (4)	Average (3)	Need Improvement (2)	Poor (0 - 1)	Select Score
□ Comprehensive list of references is included. □ References are presented in appropriate format. □ In-text citations provided correctly and wherever necessary.	□ Sufficient list of references is included. □ References are presented mostly in appropriate format, with minor inconsistencies. □ In-text citations provided mostly correct and wherever necessary.	□ A list of adequate reference is included. □ Frequent errors in the references. □ In-text citations provided, but some of the in-text citations are not appropriate.	□ Reference list is included, but not adequate and appropriate. □ Does not comply with the reference format. □ Minimal in-text citations.	□ Fails to achieve a minimum standard outlined in the descriptors.	

9. QUALITY OF THE REPORT

Score and Descriptors

Excellent (12 - 15)	Good (10 - 11)	Average (8 - 9)	Need Improvement (6 - 7)	Poor (0 - 5)	Select Score
□ Writing is well organized, contain sound logical structure, easy to read. □ Spell-checked and proofread – free from typo and grammatical errors. □ Comply with the formatting guidelines.	□ Writing is generally well organized, contain good logical structure, mostly easy to read. □ Spell-checked and proofread – few typo and grammatical errors. □ Mostly comply with the formatting guidelines, with occasional formatting issues.	□ Report is readable, but requires some effort to understand. □ Content is somewhat organized, but there are several parts which seems out of the place. □ Spell-checked and proofread – typo and grammatical errors are frequent □ Attempts to comply with the formatting guidelines, □ Major formatting issues.	□ Report is difficult to read and understand. □ Writing does not flow well. □ The content are poorly organized. □ Spell-checked and proofread – typo and grammatical errors are very frequent (almost every page contains some error in the writing). □ No attempt to comply/ does not comply with the formatting guidelines.	□ Fails to achieve a minimum standard outlined in the descriptors.
